

## **Post Nuptial Agreements**

Post Nuptial Agreements allow married couples to divide their property currently and prospectively. It is important however, to be sure that the Post Nuptial Agreement is free from fraud, undue influence, or coercion. It is also extremely important that each party enter into the agreement with full disclosure as to all property and debts. Arizona courts generally uphold Post Nuptial Agreements and are scrutinized under contract principles and case law. Post Nuptial Agreements can be used to save a trouble marriage or to manage your marital estate.
